

MOBILE LITE

ITEM NO.
LS2000-14

- Adequate lighting is crucial in surgical procedures to maximize efficiency.
- MOBILE LITE is a non-invasive assistive surgical illuminator.
- Achieves optimal visual assistance inside deep surgical cavities for different surgical approaches.
- Eliminates shadows that could disturb the surgeon during surgery.
- Highly flexible according to the required angles.
- It features a bright, single LED that provides an intensive light source and consumes less energy for improved facility efficiency.
- Can be easily attached to an I.V. pole or stand.
- Perfect for specialties that require focused light in very specific areas, such as Hip Arthroplasty, Laparotomy, Tonsillectomy, Dental Procedures, Oropharyngeal examination. Also works as assistive lighting in ambulatory surgery centers.
- Use in combination with Protective Sleeve to provide a sterile barrier in the surgical field.
