

# PULSE LAVAGE

## 2500K4-DP-C

**PULSATING SALINE LAVAGE,  
PRESSURIZED CO2 AND SUCTION**

**Built-in  
BATTERY  
PACK**

Pulsating saline lavage, pressurized CO2 and suction  
Specifically made for orthopedic arthroplasty bone bed preparation.

The pulse lavage has the ability to significantly clean and remove debris, whilst simultaneously applying suction. Pressurized CO2 dries cancellous bone after the saline lavage, removing residual fluid and fatty material prior to cement implantation, and therefore diminishing excess fluid between the cement and bone. Increased bone cement penetration also increases implant fixation, thus reducing the arthroplasty revision rate.

**Co2 Trigger**

**Pulse Lavage Trigger**

Battery Pack can be Disposable Type or Rechargeable Type

**Co2**  
BLOW DRY

Pressurized CO2

### 2500 K4-DPRB-C

Not included Battery Pack  
Rechargeable Battery Pack optional

### 2500K4-DP-C

Built-in Disposable Battery Pack

### K4-RB

Rechargeable Battery Pack

### K4-CH

Battery Charger (for K4-RB)

## Advantages

- ✓ Built-in battery pack design without additional battery box
- ✓ Ergonomic design comfortable to handle and use
- ✓ Battery pack easy to remove user friendly design
- ✓ Easy attached & released tip accessory
- ✓ Sterile contents, zero infection
- ✓ Tube length 3M
