

Medical CAMERA DETECTOR

ITEM NO.
EFL04250 | ERL04250 | EFAL09100

New, innovative endoscope is combined with 21st century technology to create a low-cost, disposable camera module with superior high-definition optics. Pico Eye can be used within multiple applications.

- Pico Eye easily detects skin, hair follicles, oral cavity, nasal cavity, ear, throat, wounds, acne, uterine, abdomen, and rectum.
- The clear image and video can be shown on big screen.

- The smooth appearance and low temperature of the lens means that it does not cause pain or discomfort.
- Comes with three accessories for different applications.
- The Medical Camera Detector is available in both wired and wireless styles
